THE PROBLEM

Human traders lose to the market. AI doesn't have to.

- ✗ **Emotional decision-making** — fear and greed drive poor timing and costly mistakes
- ✗ **Slow execution** — human reaction speed can't compete with algorithmic markets
- ✗ **Market-dependent returns** — traditional strategies only profit when prices go up
- ✗ **Institutional lock-out** — algorithmic trading has always been reserved for hedge funds with millions in capital

80%

of retail traders **lose money**. The edge has always belonged to institutions — until now.

THE OPPORTUNITY

Institutional-grade AI trading — accessible to everyone, starting from \$100

Arc-Fi deploys the same precision arbitrage strategies used by institutions, through autonomous AI agents that anyone can activate — regardless of experience or capital size.

WHAT IS ARC-FI

Institutional-grade AI trading, accessible to **everyone**

Arc-Fi is a next-generation autonomous AI-powered trading infrastructure built to deliver intelligent, real-time execution across digital asset markets. By combining advanced algorithmic trading with **precision arbitrage**, Arc-Fi enables any user — regardless of experience — to access high-performance market strategies through a single, unified platform. **Starting from as little as \$100.**

Autonomous

AI agents execute trades 24/7 without any manual intervention. Set it up once and let the engine work.

Transparent

Every trade is logged in real time on your dashboard. Every transaction is verifiable on-chain. No black boxes.

Accessible

Start with \$100 using the AURA-01 agent. No trading experience required. Scale to any level at your own pace.

THE ENGINE

ArbiMind — the proprietary AI brain that never stops learning

At the core of Arc-Fi is ArbiMind — a proprietary AI neural core engineered to analyze market structure, detect price inefficiencies across multiple blockchains simultaneously, generate high-probability trade signals, and manage capital allocation with **machine-level precision**. Operating in continuous feedback loops, ArbiMind learns from both historical and live data to refine timing, optimize execution, and adapt to changing market conditions in real time.

KEY DIFFERENTIATOR

ArbiMind executes **arbitrage** — capturing profit from price differences across exchanges — meaning returns are generated **regardless of whether the market goes up or down**.

CORE CAPABILITIES

01

Analyze

Continuously scans market structure across 4 blockchains and 43+ DEX protocols in real time

02

Detect

Identifies price inefficiencies and arbitrage opportunities with millisecond precision

03

Generate

Produces high-probability trade signals and executes only the highest-confidence opportunities

04

Manage

Allocates capital dynamically, manages risk exposure, and adapts strategy based on live conditions

Never Sleeps

Never Hesitates

Never Emotional

HOW IT WORKS

Four steps from deposit to **daily returns**

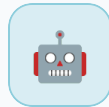

STEP 01

Fund Your Wallet

Deposit capital into your Arc-Fi account. Minimum \$100 to activate the entry-level AURA-01 agent.

STEP 02

Choose Your AI Agent

Select the agent tier that matches your investment level — AURA-01, NEURA-X, or VORTEX-9.

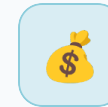

STEP 03

Agent Deploys

ArbiMind executes precision arbitrage trades Mon–Sat across DeFi ecosystems. Earnings accumulate daily.

STEP 04

Cycle Completes

At cycle end, your full capital plus all accumulated profits are returned to your wallet automatically.

- No manual trading required. No charts to watch. No experience needed. The AI does the work. •

DUAL-MODE TRADING

Two ways to participate — automated or hands-on

MODE 01

Auto Trade

Activate an AI agent and let it run. Your capital is deployed autonomously into cross-chain DeFi arbitrage. **No charts to watch. No decisions to make.** The agent executes trades Monday through Saturday and returns your full capital plus profits at cycle end.

- **Zero manual intervention** — agent operates independently once activated
- **Daily earnings accumulation** — logged every 2 hours on your dashboard
- **Compounding available** — reinvest earnings for exponential growth (40-day min)
- **Capital returned automatically** — full principal + profits at cycle end

IDEAL FOR

Anyone who wants passive income without trading experience or daily involvement

MODE 02

Signal Pro

Receive real-time AI-generated trade signals from ArbiMind and execute trades yourself. **Stay in control of every position** while still benefiting from the same intelligence layer that powers the automated agents.

- **Live AI signals** — 1 to 4 actionable signals per day depending on plan
- **Trade from \$50** — low barrier to entry for active traders
- **ArcWave plan** — \$99/month, 1 signal/day, Priority support
- **Arc Quantum plan** — \$199/month, 3–4 signals/day, VIP support

IDEAL FOR

Experienced traders who want AI-powered intelligence while maintaining direct market control

ARBIMIND ENGINE

AI TRADING AGENTS

Three agents. One engine.
Every level of investor.

All agents trade Mon–Sat and return full capital
+ profits automatically at cycle end

ENTRY LEVEL AURA-01 DAILY ROI RANGE 0.9–1.3% Min. Investment \$100 Trading Days Mon – Sat Lock Duration User-defined Capital + Profit auto-credited at cycle end	MID LEVEL NEURA-X DAILY ROI RANGE 1.4–1.7% Min. Investment \$5,000 Trading Days Mon – Sat Lock Duration User-defined Capital + Profit auto-credited at cycle end	ADVANCED VORTEX-9 DAILY ROI RANGE 1.8–2.1% Min. Investment \$12,000 Trading Days Mon – Sat Lock Duration User-defined Capital + Profit auto-credited at cycle end
---	---	--

SIGNAL PRO

Real-time AI signals for active traders

For users who prefer to execute their own trades, Arc-Fi's **Signal Pro** subscription delivers actionable, real-time trade signals generated directly by ArbiMind — the same AI intelligence layer that powers the automated agents.

- ✓ Signals generated by ArbiMind in real time
- ✓ You stay in full control of your own execution
- ✓ Trade from as little as \$50
- ✓ No lock-up period — your capital stays liquid

PROOF OF PERFORMANCE

175,679 real trades. \$8M in volume.
6 days. Every one verifiable on-chain.

Arc-Fi's performance is not based on backtested simulations. Every transaction executed by ArbiMind carries a **verifiable blockchain hash**. This is a record — not a projection.

TOTAL TRADES

175,679

Live trades executed across 6 consecutive days of operation

TRADING VOLUME

\$8,002,165

Total USD volume processed through ArbiMind's execution engine

DEX PROTOCOLS

43

Decentralized exchanges used simultaneously to source the best prices

BLOCKCHAINS

4

BSC, Solana, Tron, and Ethereum — scanned in parallel at all times

AVG TRADES / DAY

29,280

Average daily trade count — active at every hour of every trading day

● **BNB Chain (BSC)**
High-speed, low-fee DeFi execution

● **Solana**
Ultra-fast settlement, sub-second finality

● **Tron**
High-throughput stablecoin arbitrage

● **Ethereum**
Largest DeFi liquidity ecosystem

VORTEX-9 — VERIFIED RESULTS

Consistent returns across every completed cycle

The following results represent **verified completed cycles** from the VORTEX-9 agent, sourced directly from the Arc-Fi platform dashboard. Every cycle ID is verifiable on-chain.

TOTAL PNL

\$22,669

AVG RETURN / CYCLE

15.1%

COMPLETED CYCLE HISTORY

CYCLE	DURATION	PERFORMANCE	RETURN
#01	15 days		+20.35%
#02	10 days		+18.57%
#03	7 days		+13.15%
#04	7 days		+12.84%
#05	7 days		+12.67%

COMPOUNDING

Consistent daily gains become exponential growth

Compounding reinvests your daily earnings back into the principal — so each day's returns are calculated on a **progressively larger balance**. Over a 40-day cycle at 1% daily, compounding delivers 22.5% more returns than simple accumulation. The longer the cycle, the greater the effect.

REQUIREMENT TO ACTIVATE

Minimum lock duration of **40 days**. Available on all three Arc-Fi AI trading agents.

Available on: AURA-01 NEURA-X VORTEX-9

SIMPLE

+\$400

$\$1,000 \times 1\% \times 40 \text{ days}$
No reinvestment

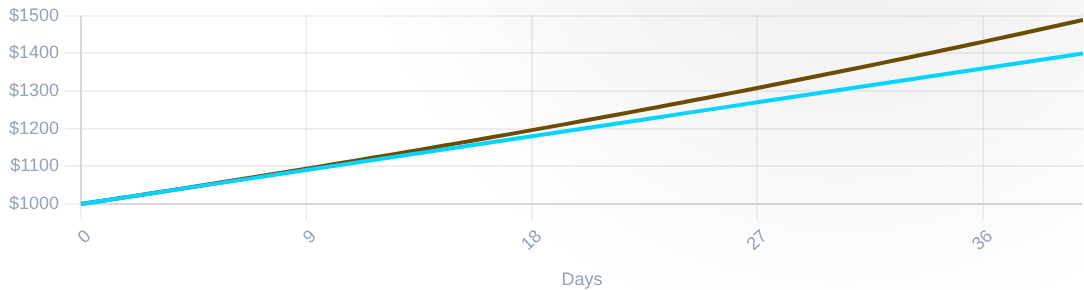

COMPOUNDED

+\$490

$\$1,000 \text{ at } 1\% \text{ daily}$
Reinvested each day

22.5% more returns from compounding alone — same capital, same rate, same duration. The only difference is reinvestment.

● Simple accumulation ● Compounded growth

FULL TRANSPARENCY

Every trade, every return, every cycle — **visible in real time**

Arc-Fi's platform dashboard gives members **complete visibility** into their investment activity. There are no hidden fees, no black boxes, and no surprises. Your capital is yours throughout the cycle, and the full balance plus profits is returned automatically when the cycle ends.

No hidden fees — every cost is visible before you activate

Earnings logged every 2 hours — track accumulation in real time

Capital returned automatically — no manual withdrawal needed at cycle end

DASHBOARD FEATURES

01

Real-Time Trade Monitoring

Watch ArbiMind execute live trades across BSC, Solana, Tron, and Ethereum as they happen

02

Daily Earnings Tracker

See your earnings accumulate with updates every 2 hours throughout the trading day

03

Wallet Management

Manage deposits, withdrawals, and capital allocation from a single unified interface

04

Performance Analytics

Review historical cycle results, ROI trends, and agent performance data at any time

SECURITY

Institutional-grade security built into every layer

Arc-Fi was designed with security as a **foundational requirement**, not an afterthought. Every component of the platform — from trade execution to account access — is protected by multiple layers of security infrastructure.

- **No private keys stored.** Arc-Fi does not hold your seed phrases or grant backend control to any third party.

01

Encrypted Trade Execution

All ArbiMind and autonomous agent activities, signal communications, and transaction data are encrypted and routed through secure protocols.

02

Real-Time Risk Monitoring

Dynamic risk protocols continuously monitor exposure and automatically minimize risk during high-volatility market events.

03

Multi-Factor Authentication

Account access is protected with optional two-factor authentication and real-time login alerts to prevent unauthorized access.

04

No Hidden Access

Arc-Fi does not store private keys, seed phrases, or grant backend control to third parties. Your assets remain under your control at all times.

LEGAL & REGULATORY

Registered, regulated, and accountable

ARC-FI Limited is registered in the British Virgin Islands — one of the world's most established and crypto-friendly regulatory jurisdictions. The company is regulated by the **Financial Services Commission (FSC)** and accredited by Approved Investment Managers and Professionals, providing members with a verifiable legal foundation and institutional-grade accountability.

Official incorporation certificate available at arc-fi.ai/assets/incorporation.pdf

REGISTRATION

British Virgin Islands (BVI)

One of the world's most established and crypto-friendly regulatory jurisdictions, recognized globally for financial services

REGULATOR

Financial Services Commission (FSC)

Accredited by Approved Investment Managers and Professionals — providing institutional-grade oversight and accountability

ASSET MANAGEMENT AUTHORIZATION

\$600M

Arc-Fi is authorized to manage assets of other funds up to \$600 million under FSC accreditation

REFERRAL SYSTEM

Share Arc-Fi and earn from your network — 6 levels deep

Arc-Fi's referral system pays commissions across **6 levels of depth**. When your team members activate agents and generate trading volume, you earn. When the people they introduce generate volume, you earn again — all the way down to level 6.

HOW COMMISSIONS ARE PAID

Commissions are paid on both the **1st and Volume Tier 2s** of each referred member at every level. Your earning potential grows with your network, not just your direct referrals.

- Referral rewards are a **bonus on top** of your AI trading returns — not the primary income source

COMMISSION STRUCTURE

LEVEL	VOLUME TIER 1	VOLUME TIER 2	DEPTH
● Level 1 Direct referrals	5%	5%	
● Level 2 Your referrals' network	3%	3%	
● Level 3 Team depth	2%	2%	
● Level 4 Team depth	1.5%	1.5%	
● Level 5 Team depth	1%	1%	
● Level 6 Team depth	0.5%	0.5%	

WEEKLY RESIDUAL INCOME

Build a team that pays you every single week

Once your team's total cumulative revenue reaches a qualifying milestone, you begin earning a **weekly percentage of all team trading volume** made by your entire network — automatically, every week.

- 1 Your team members activate agents and make deposits — this builds your **total team revenue**
- 2 When your team hits a revenue milestone, you **unlock a weekly bonus tier**
- 3 Each week, you earn a percentage of all **team trading volume** across your entire team — automatically

BONUS TIERS — TEAM REVENUE MILESTONES

TIER 1 Team Revenue \$450,000 Weekly Bonus 0.5% of your team's weekly trading volume	TIER 2 Team Revenue \$800,000 Weekly Bonus 1.0% of your team's weekly trading volume	TIER 3 Team Revenue \$1,500,000 Weekly Bonus 1.3% of your team's weekly trading volume
--	--	--

RANK ACHIEVEMENT

Reach elite milestones. Earn one-time bonuses.

Arc-Fi's rank achievement program rewards leaders who reach significant team revenue milestones with **one-time cash bonuses** and recognition. These milestones create clear progression targets and acknowledge the leaders building the Arc-Fi community at the highest level.

- Starter ranks — **team building begins** 
- Mid ranks — **residual income unlocks** 
- Elite ranks — **achievement bonuses awarded** 

● Arc-Fi operates a **7-rank achievement system** — each rank carries its own milestone target and one-time reward.

ELITE RANK EXAMPLE

ONE-TIME BONUS
\$100K
Cash bonus on achievement

Upon reaching the Aether rank, members receive a **\$100,000 one-time cash bonus** plus a digital achievement badge recognizing their leadership status within the Arc-Fi community.

ROADMAP

A clear path toward global AI trading infrastructure

WHY ARC-FI IS DIFFERENT

Real Data. Real Engine. Real Returns. Not Hype.

The DeFi space is filled with platforms that make bold promises backed by nothing. Arc-Fi was built as the answer to that — every claim is backed by **verifiable on-chain data**.

01

Real Trading Data

175,679 live trades executed. \$8,002,165 in volume. 6 consecutive days. Every transaction carries a verifiable blockchain hash. This is not a projection — it is a record. Anyone can verify Arc-Fi's trading activity on-chain at any time.

175K+ trades verifiable on-chain

02

Real Engine

ArbiMind executes **live arbitrage across 4 blockchains and 43+ DEX protocols simultaneously** — not backtested simulations dressed up as live results. The engine is running right now, generating returns regardless of whether the market goes up or down.

Live arbitrage — not simulations

03

Real Leadership

Arc-Fi is led by a CEO who is **personally invested in the platform** — not just as a founder, but as a participant. The same system that members use is the system the leadership team uses. When leadership has skin in the game, the incentives are right.

Leadership invested alongside members

04

Real Sustainability

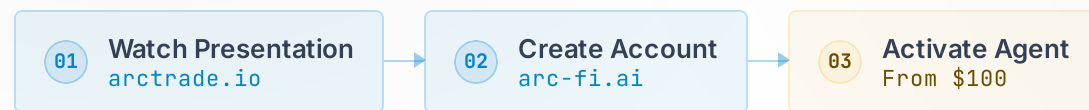

Most platforms in this space are unsustainable because they rely on recruitment to pay existing members. Arc-Fi's returns are **generated by real trading activity** — not new member deposits. The model can run indefinitely as long as the AI continues to generate returns from the market.

Returns from markets, not recruitment

● GET STARTED TODAY

The Future Starts Now.

Arc-Fi is live, operational, and generating returns for members around the world. The platform starts at **\$100** — a system that works for you every single day.

LEGAL NOTICE

Income Disclosure Statement

Arc-Fi is committed to full transparency. The information presented in this deck is for **informational purposes only** and does not constitute financial, investment, or legal advice. Please read the following disclosures carefully before making any investment decision.

IMPORTANT

Results shown in this presentation are not typical. Individual results will vary significantly based on market conditions, agent selection, capital deployed, lock duration, and other factors. There is no guarantee of profit.

1

No Guarantee of Earnings

Participation in Arc-Fi's AI trading platform does not guarantee any specific level of income or return. The daily ROI ranges stated (0.9%–2.1%) represent the platform's historical operating range and are not a promise of future performance.

2

Past Performance Is Not Indicative of Future Results

All cycle results, trade data, and performance figures shown in this presentation reflect historical activity. Cryptocurrency markets are highly volatile. Past performance does not guarantee future returns.

3

Risk of Loss

Cryptocurrency trading involves substantial risk of loss. You should only invest capital you can afford to lose entirely. Arc-Fi's AI agents operate in volatile DeFi markets where losses can occur.

4

Referral & Team Volume Earnings

Commissions earned through the referral system are based on team trading volume activity and are not guaranteed. Earnings depend entirely on the volume generated by your network. Building a team requires effort, skill, and time.

5

Not Financial Advice

Nothing in this presentation constitutes financial, investment, tax, or legal advice. Consult a qualified financial professional before making investment decisions.
